This is to inform all students of B.B.A.(CA) & B.Sc.(CS) for the academic year 2022-2023 that Sancheti College of Arts, Commerce and Science, organizes a value added course of "Basic C language" will be conducted at college from 22/08/2022 to 09/09/2022 at 9:00 am to 11:00 am. Interested students enroll your names to respective teachers.

Course duration = 34 Hours.

Trainer: Mrs. Radhika D. Jadhav

Course - coordinator

Basic C language

Syllabus Framework

Unit 1: Introduction to C Language

- **History and Evolution:** Understand the origin, development, and significance of the C programming language.
- **Features and Characteristics:** Explore the key features, advantages, and applications of C.
- **Structure of C Program:** Learn the basic structure, components, and syntax of a C program.

Unit 2: Operators in C

- **Arithmetic Operators:** Addition, subtraction, multiplication, division, modulus operations.
- **Relational Operators:** Comparison operations like equal to, not equal to, less than, greater than, etc.
- **Logical Operators:** Logical AND, logical OR, logical NOT operations.
- **Bitwise Operators:** Bitwise AND, bitwise OR, bitwise XOR, bitwise NOT operations.
- **Assignment Operators:** Assignment, compound assignment operations.
- **Miscellaneous Operators:** Ternary conditional operator, sizeof() operator, comma operator.

Unit 3: Control Structures in C

Conditional Statements:

- **if-else Statements:** Implement conditional logic using if-else statements in C.
- **Nested if-else:** Understand and implement nested conditional statements for complex decision-making.

Switch Case Statements:

- **Nested Switch Case:** Learn to use nested switch-case statements for multiple condition evaluations.

Unit 4: Problem-solving, Algorithms, and Flowcharts

- **Introduction to Problem-solving:** Understand the problem-solving approach using algorithms, flowcharts, and pseudo code.
- **Divide & Conquer:** Learn the divide and conquer strategy to solve complex problems by breaking them into smaller sub-problems.

- **Time Complexity:** Explore the concept of time complexity to analyze and evaluate algorithm efficiency.
- **Algorithms:** Study various algorithms, their design, analysis, and implementation in C programming.
- **Flowchart and Pseudo code:** Design flowcharts and write pseudo code to represent algorithmic solutions systematically.

Unit 5: Simple Arithmetic Problems in C

- **Simple Arithmetic Operations:** Solve basic arithmetic problems using C programming, focusing on addition, subtraction, multiplication, division, and modulus operations.

Unit 6: Functions in C

- **Basics of Functions:** Understand the concept of functions, their definition, declaration, and usage in C programming.
- **Parameter Passing Techniques:**
 - **Call by Value:** Learn to pass function arguments by value, understanding parameter copies and modifications.
 - **Call by Reference:** Explore passing function arguments by reference using pointers, enabling direct memory access and modifications.

Course Outcome:

- Students know the structure, concepts and importance of C programming Language
- Students are able to solve the task using C programming.
- Students are able to write programs using User Defined functions.
- Students are able to use build in functions, derive and user defined data types
